External Reproductive Structures

Depending on the sex of the fetal pig, external reproductive features vary.

Male Pig:

- Prepuce: A sheath of skin covering the penis.

Common Dissection Questions and External Anatomy Answer Key

To assist in study and dissection, here are typical questions and their detailed answers:

Q1: How can you identify the anterior (front) and posterior (back) ends of the fetal pig?

- Answer: The anterior end is distinguished by the presence of the head, with the snout, eyes, and ears. The posterior end features the tail and anus. The head is oriented toward the top of the dissecting tray, and the tail is toward the bottom.

Q2: Where are the forelimbs and hindlimbs located?

- Answer: The forelimbs are attached near the shoulders, located on the lateral sides of the upper trunk. The hindlimbs are attached near the pelvis at the posterior end of the trunk.

Q3: How do you determine the sex of the fetal pig externally?

- Answer:

- Male: Presence of a small prepuce covering the penis, with the genital papilla located ventral to the anus.

- Female: Vulva is a slit-like opening ventral to the anus, and the genital papilla is located near the vulva.

Q4: What external features can help identify the pig's dorsal (back) from ventral (belly) side?

- Answer: The dorsal side is the pig's back, usually with the backbone visible as a ridge along the top. The ventral side is the underside, with the belly, umbilical cord, and genital openings.

Q5: Describe how to locate the umbilical cord and navel.

- Answer: The umbilical cord is a thick, cord-like structure running from the ventral side of the pig's abdomen, indicating the connection to the placenta during development. The navel is the scar left after the umbilical cord detaches, located centrally on the ventral surface.

Additional External Features to Recognize

- Claws/Nails: Found at the tips of digits, used for digging, climbing, or grooming.
- Skin: Usually smooth and slightly wrinkled; color varies but is typically pigmented.
- Fetal Pig Size: Smaller and less developed than adult pigs, with translucent or less pigmented skin.
