Sample Trade Test Questions and Their Detailed Answers

Below are several example questions with comprehensive explanations to help candidates prepare effectively.

Question 1: Reading a Technical Drawing

Given a technical drawing showing a shaft with keyways, identify the standard dimensions for keyway width and depth according to ISO standards.

Answer:

According to ISO 773 standard, the keyway dimensions depend on the shaft diameter. For example:

- For a shaft diameter of 20 mm, the keyway width is typically 4 mm, and the depth is 2.5 mm.
- For a shaft diameter of 40 mm, the keyway width is 8 mm, and the depth is 4 mm.

Always refer to the relevant ISO standard or engineering drawing notes for specific dimensions.

Question 2: Calculating Load and Stress

If a bolt with a diameter of 10 mm is tightened to a torque of 50 Nm, estimate the tension force in the bolt assuming a coefficient of friction of 0.2.

Answer:

Using the simplified torque-tension relationship:

$$ T = K \times F \times d $$

Where:

- T = torque (Nm)
- K = torque coefficient (usually around 0.2 for dry threads)
- F = tension force (N)

- d = bolt diameter (m)

Rearranged:

$$F = \frac{T}{K \times d}$$

Convert units:

- $d = 10 \text{ mm} = 0.01 \text{ m}$
- $T = 50 \text{ Nm}$

Calculate:

$$F = \frac{50}{0.2 \times 0.01} = \frac{50}{0.002} = 25,000 \text{ N}$$

So, the tension force in the bolt is approximately 25 kN.

Question 3: Troubleshooting a Mechanical System

A gear train is slipping under load. What could be the causes, and how would you rectify the issue?

Answer:

Possible causes include:

- Worn or damaged gears causing poor engagement.
- Incorrect gear meshing or misalignment.
- Insufficient lubrication leading to increased friction.
- Loose gear shafts or mounting hardware.

Rectification steps:

- Inspect gears for wear or damage; replace if necessary.
- Check and adjust gear alignment and meshing.
- Lubricate gears with appropriate lubricant.
- Tighten mounting bolts and shafts securely.
- Test the system under load to ensure proper operation.
