## Core Components of Clinical Skills

### 1. History Taking

History taking is the cornerstone of clinical assessment. It involves eliciting detailed information about the patient's presenting complaints, medical history, social background, and family history. Effective history taking requires active listening, open-ended questioning, and the ability to interpret verbal and non-verbal cues.

Key elements include:

- Presenting Complaint: Understanding the main reason for the consultation.
- History of Presenting Illness: Onset, duration, severity, progression, and associated factors.
- Past Medical History: Previous illnesses, surgeries, hospitalizations.
- Medication History: Current and past medications, allergies.
- Social and Lifestyle History: Smoking, alcohol, occupation, living conditions.

- Family History: Hereditary conditions and familial diseases.

## 2. Physical Examination

Physical examination complements history-taking by providing objective data. It involves systematic assessment techniques tailored to the patient's complaints.

Typical steps include:

- Inspection: Observing general appearance, skin, and specific areas.
- Palpation: Feeling for texture, temperature, tenderness, and swelling.
- Percussion: Tapping to assess underlying structures.
- Auscultation: Listening to sounds from the heart, lungs, and abdomen.

Mastery in physical examination requires knowledge of anatomy and physiology, as well as the ability to detect subtle abnormalities.
