The Industrial Revolution, spanning from the late 18th to the early 19th century, marked a pivotal shift from agrarian economies to industrialized societies. During this period, factories emerged as centers of mass production, requiring a large workforce. Women, particularly young women and girls, became a vital part of this workforce due to several factors:

- Availability of cheap labor

- Employment opportunities in urban areas replacing traditional domestic roles

In cities like Manchester, Birmingham, and Lowell (USA), factory girls became emblematic of the new economic order.
