PNG University of Technology, commonly known as Unitech, is a leading center for

technical education in Papua New Guinea. The university offers a broad range of programs

in engineering, natural sciences, business, and technology disciplines. The 2013 exam

results were particularly anticipated due to various academic reforms introduced that

year, including updated curricula and more stringent assessment criteria.

The university's exam system typically involves a combination of continuous assessments,

practical projects, and final examinations. These components collectively determine the

students' overall performance. The 2013 exam session, culminating in the release of results, was the first to fully implement the new grading system aligned with international standards.

## **Analyzing the 2013 Exam Results: Performance Metrics and Trends**

The png university of technology 2013 exam results indicate a complex picture of student achievement across multiple faculties. While the overall pass rate showed improvement compared to previous years, disparities among departments highlighted ongoing challenges.

### **Pass Rates and Grade Distribution**

Data from the 2013 exam results reveal that the university achieved an approximate pass rate of 68%, marking a slight increase from the 65% recorded in 2012.
