****Bandsaws and Plasma Cutters:**** These offer more precision and speed for cutting complex shapes or thick plates.

****Chisels and Hammers:**** For manual shaping and adjusting metal pieces when power tools aren't practical.

Selecting the right cutting tool depends on the material thickness, the type of cut required, and the working environment.

Welding and Joining Tools

No boilermaker's toolkit would be complete without welding equipment, as joining metal parts securely is fundamental.

****Arc Welders (SMAW):**** Stick welding is often used on-site for its portability and reliability.

****TIG and MIG Welders:**** These provide cleaner welds and are preferred for detailed or thin metal work.

****Welding Helmets and Gloves:**** Personal protective equipment (PPE) is vital to

safeguard against sparks, UV radiation, and heat.

****Clamps and Welding Magnets:**** These hold metal pieces firmly in place during welding, ensuring alignment and safety.

Understanding the nuances of each welding method and having the appropriate tools can dramatically affect the integrity of the final product.

Safety Gear and Personal Protective Equipment

The SD 002 boilermaker equipment and tool list doesn't overlook safety, which is paramount in such a physically demanding and potentially hazardous trade.
